CREATIVITY

SIAMP

A greater hygiene and comfort with the contactless flush solutions

The brand new range of automatic flush systems brings a greater hygiene and comfort for the user. The system is ideal for public places as the user does not have to touch the flush plate.

At the same time, a smart and sharp design is offered. This design is duplicated for the ABS and glass versions so that a range community is existing.

The black glass version featuring its mirror strip allows further deepness and transparency sensation. This is a touch of elegance adapted with classy atmospheres.

Finally, light proposes a more modern atmosphere to the LEDs equipped version. The user can choose in between 7 colours in order to match the room decoration.
