SIAMP presents INTRASLIM, the optimized and universal solution for the toilets.

Concealing the cistern brings modernity and lightens your WC room.

A WIDE RANGE OF FLUSH PLATE

Choose the material, the colour, the surface and the design to match your bathroom's decoration.

2 FLUSHING TECHNOLOGIES

- Mechanical actuation: the most popular actuation solution on the market ensuring simplicity and efficiency.
- Pneumatic actuation: offset for diminished people use or for respecting the fire safety regulation, it offers a great flexibility of installation position.

VERSATILE

INTRASLIM concealed cisterns can be coupled with back to wall or wall hung bowls. Robusts, our structures

resist to a 400 kg load.

Cisterns can be fixed bricklaying or attached to a supporting wall with a light cladding as plasterboards. They can be flipped to offer a back access to inner active components when installed into a dry riser.

CONFIDENCE

100% of SIAMP's expertise is at the heart of Intraslim. As a world flushing technology specialist, SIAMP provides a high performance concealed cistern in terms of flush efficiency and reliability. INTRASLIM complies with **CE**

EN 14055
Type 1 or 2

INSTALLATION VERSATILITY & FLUSH PERFORMANCE

- 1** cistern
- 2** flush activation types
- 6** installation possibilities
- 9** fixation kinds

- 19** flush plates designs
- 59** flush plates options
- 90** mm thick

INTRASLIM BACK TO WALL - **WET WALL**

INTRASLIM

Slim 90 mm

- Concealed wet wall installation
- Insulated to prevent condensation
- Double flush front plates or remote pneumatic buttons
- Adjustable, **mechanical or pneumatic**, outlet valve
- Adjustable compact 95L quiet fill valve
- Stop valve
- 1/2" M outer water connexion
- Reversible cistern (remote pneumatic)

WET OR DRY CLADDING INSTALLATION ?

separated SKU or wet wall SKU can
be converted to dry wall installation

OFFSET COMMAND FOR DISMINISHED PEOPLE :

separated SKU or mechanical SKU
can be converted to pneumatic actuation

WALL HUNG SANITARY STANDARD HEIGHT - **WET WALL**

INTRASLIM HALF FRAME

Fits into 90 mm thick blocks

- Wall fixing structure load bearing to 400kg
- Optional feet
- Concealed wet wall installation
- Insulated to prevent condensation
- Double flush front commands or remote pneumatic buttons
- Adjustable **mechanical or pneumatic** outlet valve
- Compact 95L inlet valve
- Brass stop valve

Optional 90° drain connection kit :

- HDPE Ø 90 mm male
- HDPE Ø 100 mm male
- HDPE Ø 110 mm male
- PVC Ø 100 mm male

**OFFSET COMMAND
FOR DISMINISHED PEOPLE :**
separated SKU or mechanical SKU
can be converted to pneumatic actuation

INTRASLIM WET/LIGHT WALL + SCB 350

Slim 90 mm

Self-supporting

INTRASLIM WET/LIGHT WALL

- Concealed wet wall installation
- Double flush front commands or remote pneumatic buttons
- Adjustable mechanical or pneumatic outlet valve
- Adjustable noiseless float valve

SCB 350

- Self-supporting structure load bearing to 400kg
- Accepts flush supply sleeves from Ø30 to Ø50mm
- Accepts WC drain connections from Ø90 to Ø120mm

WALL HUNG SANITARYWARE STANDARD HEIGHT - **LIGHT WALL**

WALL INTRASLIM LOW DEPTH

Supporting wall fixation

WALL INTRASLIM FULL FRAME

Slim for narrow depth installation

- Concealed DRY or WET wall installation
- Structure load bearing to 400kg
- Insulated to prevent condensation
- Double flush front commands or remote pneumatic buttons
- Adjustable, mechanical or pneumatic, outlet valve
- Compact 95L inlet valve
- Brass stop valve

Optional 90° drain connection kit :

- HDPE Ø 90 mm male
- HDPE Ø 100 mm male
- HDPE Ø 110 mm male
- PVC Ø 100 mm male

WALL INTRASLIM VERY LOW DEPTH

Supporting wall fixation

Fits into a 90 mm block
